STEEL GARAGE METAL BUILDING

CALL NOW TO ORDER!

Measures 12' wide by 21' long and has roll-up garage door on front wall. With 252 square feet of storage space, the steel garage is great for storing one car or truck, with added space on the ends for equipment. Customize the dimensions or features on our metal buildings for whatever you need, including changing the dimensions or adding entry doors and windows. Choose from our wide selection of colors to find one that matches other buildings on your property.

Designed to protect your vehicles for years to come. We manufacture all of our metal buildings with American-made galvanized steel framing and heavy duty roofing panels. The steel frame is reinforced with bracing on the corners and center. The regular roof seamlessly connects to side wall paneling to protect your valuables from harsh weather. Guaranteed to be free of leaks and other defects.

LAND/CEMENT FOUNDATION MUST BE LEVEL

- Cement should be 1 ft. shorter than roof length.
- Cement must be level and square from corner to corner.
- Return trip fees will apply if building is not installed.

In order to get the highest quality installation, we ask to have the site prepared and ready to go on the day of installation. There should be no electrical wires less than 15 feet above the peak height and confirm no underground utilities will be impacted by the installation process (must be 4' or more beneath the impacted areas for ground installation). Remember, all of our structures come with free installation and free delivery.
