METAL SINGLE CAR CARPORT WITH VERTICAL ROOF CALL NOW TO ORDER!

Outstanding storage for car, truck, and heavy equipment. Shield your valuables and avoid costly repairs. With a strong vertical roof, gabled ends, and extra side panels, it's built for maximum protection. Up to 252 sq. ft. of storage space. Customize with added side walls and ends for a fully enclosed garage, adjust the dimensions, and much more. Choose from our large color selection to match your style and existing structures on your property. Our carports can double as a picnic shelter, auto repair area, outdoor workshop, and many other great uses.

The vertical roof is our strongest design; guaranteed to be free of leaks and other defects. Manufactured with heavy duty-galvanized steel framing and premium quality roof panels. Includes bracing at the corners and center of each building, as well as a strong steel truss system. Quality side paneling guards your vehicles and equipment from rain, sleet, snow, and the harsh sun.

LAND/CEMENT FOUNDATION MUST BE LEVEL

CONCRETE PAD

LEVEL SITE

- Cement should be 1 ft. shorter than roof length.
- Cement must be level and square from corner to corner.
- Return trip fees will apply if building is not installed.

In order to get the highest quality installation, we ask to have the site prepared and ready to go on the day of installation. There should be no electrical wires less than 15 feet above the peak height and confirm no underground utilities will be impacted by the installation process (must be 4' or more beneath the impacted areas for ground installation). Remember, all of our structures come with free installation and free delivery.
