STEEL 1-CAR CARPORT WITH VERTICAL ROOF

CALL NOW TO ORDER!

Looking for affordable storage? This 1-car metal carport is a great solution. With 252 sq. ft. of storage space, this carport can comfortably store one car, truck, or assorted lawn equipment. Steel frame walls are 1' shorter than the roof length. Customize your carport by adjusting dimensions, features, and more. Choose from our large color selection to match your style and existing property structures. With the sides and back end enclosed, as well as a gable on the front end, your valuables will have maximum protection from the elements.

Our carports are manufactured with premium grade steel framing and 29-gauge roof panels, and reinforced with bracing on the corners and center of the structure. Concrete-specific anchors included at no extra charge. Innovative truss design allows for buildings up to 60' wide, without any interior supports. The vertical roof is our strongest design and is guaranteed to be free of leaks and other defects.

LAND/CEMENT FOUNDATION MUST BE LEVEL

CONCRETE PAD

LEVEL SITE

- Cement should be 1 ft. shorter than roof length.
- Cement must be level and square from corner to corner.
- Return trip fees will apply if building is not installed.

In order to get the highest quality installation, we ask to have the site prepared and ready to go on the day of installation. There should be no electrical wires less than 15 feet above the peak height and confirm no underground utilities will be impacted by the installation process (must be 4' or more beneath the impacted areas for ground installation). Remember, all of our structures come with free installation and free delivery.
