RV COVER VERTICAL ROOF

CALL NOW TO ORDER!

At 12' wide x 31' long x 12' tall, this RV carport provides 372 square feet of storage space. Can easily store 1 car, truck, RV, or assorted lawn equipment. Extra room for large equipment. Customize your RV Carport Cover by adjusting dimensions, features, and more. Choose from our large color selection to match your style and existing structures. Open design allows RV cover maximum versatility and can be easily customized for whatever you need.

Our RV Covers are manufactured with premium grade steel framing and 29 gauge roof panels. The vertical roof is our strongest roof option. Vertical panels ensure rain flows off of the sides of the building. This reduces standing water on roof and increases building longevity. All metal buildings are reinforced with bracing on the corners and center, and we include concrete-specific anchors at no extra charge.

LAND/CEMENT FOUNDATION MUST BE LEVEL

- Cement should be 1 ft. shorter than roof length.
- Cement must be level and square from corner to corner.
- Return trip fees will apply if building is not installed.

In order to get the highest quality installation, we ask to have the site prepared and ready to go on the day of installation. There should be no electrical wires less than 15 feet above the peak height and confirm no underground utilities will be impacted by the installation process (must be 4' or more beneath the impacted areas for ground installation). Remember, all of our structures come with free installation and free delivery.
