20 X 26 TWO CAR METAL GARAGE BOXED EAVE ROOF

CALL NOW TO ORDER!

This two car metal building is a great way to protect your vehicles and equipment from bad weather and debris. The customer who originally purchased this garage used it as a boat shelter, but the structure can easily double as a two car garage. The building has dimensions of 20 wide by 26 long by 9'tall. With 520 square feet of storage space, there is plenty of room to fit two cars side by side underneath the roof. The steel garage comes standard with two large roll-up doors on the front wall, with an entry door for personal use on the side wall. Choose from our wide selection of colors to find one that matches your style or existing buildings on your property.

LAND/CEMENT FOUNDATION MUST BE LEVEL

- Cement should be 1 ft. shorter than roof length.
- Cement must be level and square from corner to corner.
- Return trip fees will apply if building is not installed.

In order to get the highest quality installation, we ask to have the site prepared and ready to go on the day of installation. There should be no electrical wires less than 15 feet above the peak height and confirm no underground utilities will be impacted by the installation process (must be 4' or more beneath the impacted areas for ground installation). Remember, all of our structures come with free installation and free delivery.
