METAL GARAGE BUILDING BOXED EAVE ROOF

CALL NOW TO ORDER!

Dimensions are 22' wide x 31' long x 9' tall. There are two separate storage sections on this building. There is a 22' x 15' enclosed area that is great for your car, truck, or outdoor equipment. There is also a 22' x 16' open area for an additional vehicle or equipment storage. Customize this garage for anything you need! Choose from our large color selection to find one that works for you.

Our steel buildings are built to last a lifetime. We only use the highest quality American-made galvanized steel for our building frames. The roof and wall panels are constructed with 29 gauge steel sheets. We also reinforce the frame with corner and center bracing for extra durability. Unlike wood and other traditional building materials, steel will never warp, crack, or rot. Termites, insects, and other pests are no issue when you have a metal building.

LAND/CEMENT FOUNDATION MUST BE LEVEL

- Cement should be 1 ft. shorter than roof length.
- Cement must be level and square from corner to corner.
- Return trip fees will apply if building is not installed.

In order to get the highest quality installation, we ask to have the site prepared and ready to go on the day of installation. There should be no electrical wires less than 15 feet above the peak height and confirm no underground utilities will be impacted by the installation process (must be 4' or more beneath the impacted areas for ground installation). Remember, all of our structures come with free installation and free delivery.
