CUSTOM RIDGELINE METAL BARN

CALL NOW TO ORDER!

Searching for affordable vehicle and equipment storage? Shelter for your animals? This metal barn is the perfect solution to your storage needs. The center structure has 12' tall legs, while the lean-tos on the side have 9' tall legs. You can customize this barn for whatever you need, including adding interior walls for separate storage sections. Barn comes standard with a 10' wide x 8' tall garage door on the front.

Manufactured with the highest quality materials available. Frame is constructed with premium American-made galvanized steel. Roof and wall panels are heavy-duty 29-gauge steel sheets. We reinforce all of our metal barns with corner and center bracing on the steel frame. Center roof is connected to the lean-tos with 3' panels. Steel structures are stronger, more affordable, and last longer than wood and other traditional building styles.

LAND/CEMENT FOUNDATION MUST BE LEVEL

- Cement should be 1 ft. shorter than roof length.
- Cement must be level and square from corner to corner.
- Return trip fees will apply if building is not installed.

In order to get the highest quality installation, we ask to have the site prepared and ready to go on the day of installation. There should be no electrical wires less than 15 feet above the peak height and confirm no underground utilities will be impacted by the installation process (must be 4' or more beneath the impacted areas for ground installation). Remember, all of our structures come with free installation and free delivery.
